

MANUFACTURER'S DECLARATION

22/06/2026

To Whom It May Concern,

This letter serves to confirm that the whey protein held, handled, and processed by Prosoma Ltd is sourced exclusively from Fonterra (NZ).

We further confirm that the whey protein supplied by Fonterra is derived from NZ dairy cattle raised in New Zealand. This grass-fed whey protein is the protein used to manufacture the NZ Muscle branded protein range produced by Prosoma Ltd.

Meeting the New Zealand Grass-Fed Standard

This standard requires that the below minimum requirements must be met or exceeded:

- Cows must have a diet which constitutes, on a 3-year rolling average, at least 90% (freshweight) qualifying grass-fed feed types.
- Cows must on average graze pasture or forage crops at least 340-days per year for at least 8-hours per day.

Fonterra meets the requirements of the New Zealand Grass-Fed standard with data showing cows are on average 96% grass-fed and spend on average over 350 days a year on pasture, which is above the New Zealand Grass-Fed Standard's requirements.
